

Dear Head Teachers

We thought it would be helpful to clarify the action schools should take if a child or member of staff are displaying coronavirus symptoms or test positive for COVID-19. Below we have provided a summary but it is worth reading official government guidance for schools on dealing with suspected or confirmed cases of COVID-19, which is available online: <https://www.gov.uk/government/publications/guidance-to-educational-settings-about-covid-19/guidance-to-educational-settings-about-covid-19>

What to do if a pupil or staff member develops symptoms

Anyone with symptoms should inform the school as soon as is possible; or if at school they should be sent home.

Symptoms include one or more of the following:

- a high temperature
- a new, continuous cough
- a loss of, or change to, your sense of smell or taste

More detail is available online: <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>

The individual should be tested for COVID-19; this can be arranged online:

<https://www.nhs.uk/conditions/coronavirus-covid-19/testing-for-coronavirus/>

They should consider alerting the people with whom they had close contact with in the last 48 hours to let them know they have symptoms of COVID-19.

What to do following a positive test

If the individual tests negative they can return to school. However, in the event of positive test result, they must self-isolate at home for seven days and follow the guidance available online:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

The individual will receive a request by text, email or phone to log into the NHS Test and Trace service website and provide information about recent close contacts. Other individuals may also need to self-isolate for 14 days; in most cases this will include the rest of their class or group, however, PHE will support the school to identify those close contacts who will need to be advised to self-isolate and any further testing required.

Cleaning and handwashing

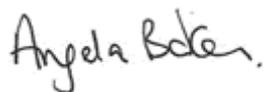

Schools are encouraged to promote regular hand washing for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered. Also ensure the practice of good respiratory hygiene by promoting the catch it, bin it, kill it approach:

<https://www.england.nhs.uk/south/wp-content/uploads/sites/6/2017/09/catch-bin-kill.pdf>

The spread of the virus can also be reduced by regular cleaning of frequently touched surfaces, such as door handles, handrails, table-tops, play equipment and toys using standard products, including detergents and bleach; this is especially important following a confirmed case. There is more detailed guidance available online: <https://www.gov.uk/government/publications/covid-19-decontamination-in-non-healthcare-settings>

Please note this is an evolving process and we would advise you to keep up to date with the guidance as published and updated regularly by the government. We will share more information with you when it becomes available.

Yours sincerely
